www.bgns.bg

Objectives

The conference will provide to academic and industrial experts a common forum to present and discuss the news and issues concerning nuclear technology and nuclear applications. The “Nuclear energy for the people” conference aims also to bring together nuclear specialists, to present their results and to raise the trust of the general public to the achievements and use of nuclear science and technologies.

Participants

Bulgarian and foreign professionals, experts and researches, related to the nuclear energy are invited to take part.

The educational policy is a key element in the building of public engagement/acceptance toward nuclear applications including energy production. It is expected that the experts will present new national and international results, as well as trends of Horizon 2020 projects.

The conference environment shall help in creating and engaging more young professionals in nuclear engineering and applications.
