Subject: Support from the Hungarian Nuclear Society

Dear Members of Ukrainian Nuclear Society, Friends and Colleagues,

On behalf of the leadership of the Hungarian Nuclear Society, I would like to voice our shock to see the war unfold in Ukraine. Targeting even nuclear facilities with military forces goes against both the international law and our principle values of nuclear culture. We believe that the decisions that led to these attacks were highly irresponsible and damaging to the nuclear effort around the World.

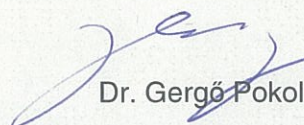

We would like to express our respect and gratitude to the staff of the nuclear facilities in Ukraine, who stand firm and continue to do their best to prevent nuclear and radiological accidents from happening in these impossible conditions. We are proud of our Ukrainian colleagues, who prioritize nuclear safety above all, which serves as a shining example for all nuclear professionals.

We are proud to have a long-standing good relationship with our sister organization, the Ukrainian Nuclear Society, which have resulted in a number of collaborations in the peaceful past, and we hope to continue this collaboration in a peaceful future. In these current troubled times, many of us feel the urge to help and support our colleagues in Ukraine. Therefore, we have decided to promote the joined fund-raising effort by ANS and ENS: [The ANS-ENS Ukrainian Nuclear Workers Humanitarian Fund.](#)

Being a civil organization, our ability to support you is limited, but we would be glad to amplify your voice on first-handed information on the status of nuclear installations. Furthermore, we can also try to organize an effort to support you with any specific requests that you might communicate towards us.

We are wishing you the power to persist and peace above all.

Best regards,

Dr. Gergő Pokol
